

The RSDD-04.

For more than
a decade...
Beehive's #1
Best-Seller.

WEILER
Food Processing Systems

BEEHIVE Inc.
A WEILER COMPANY

PROVEN WORLDWIDE PERFORMANCE

The RSDD-04 has proven to be one of Beehive's most versatile and reliable "performers." For more than 10 years, the RSDD-04 has processed millions of pounds of poultry, fish, and pre-broken red meats worldwide.

THROUGHPUT / YIELD

The RSDD-04 easily and consistently accommodates "through-put" of up to 3,000 pounds per hour, depending on raw product.

The DD-04's proven technology reliably delivers high yields—critical in maximizing processing efficiencies and assuring profitability.

UNIVERSAL APPLICABILITY

The RSDD-04 is currently installed and operating in hundreds of plants all over the world. The DD-04 debones and desines spent hens, poultry parts, frames, fish and pre-sized red meat. A single operator can control all machine adjustments, rate of throughput, meat textures and consistency of finished products (with a simple selection of variable head configurations, textures are precisely controlled).

RELIABILITY & PARTS BACK-UP

All of our customers have the peace of mind that total Weiler-Beehive support is available—literally in a matter of hours. Beehive's parts availability, plus service support at many of our agency offices, provide rapid response to problem areas when they arise.

RSDD-04 SPECIFICATIONS

- CE Approved Machine
- USDA Approved Machine
- Total Horsepower: 28 (21 Kw)
- Auger Speed (direct driven): 138 RPM
- Auger Horsepower: 20
- Pump Speed (variable): 12-71 RPM
- Pump Horsepower: 7.5
- Hopper Capacity: 9.4 cu. ft. (266 l.)
- Input Capacity (varies w/product): 1,500 lbs. (680 kg.) to 3,000 lbs. (1361 kg.) per hour
- Feedscrew: Twin
- Feedscrew Diameter: 4.38" (11.1 cm)
- Drive Assembly: Direct Drive
- Machine Dimensions: 93.7" (237.9 cm.) L x 30.0" (76.2 cm.) W x 79.9" (202.9 cm.) H
- Machine Weight (uncrated): 2,600 lbs. (1,179 kg.)
- Estimated Crated Weight: 3,400 lbs. (1,541.9 kg.)
