

# VT-Series Transfer Pump

Carruthers T-Series and Transfer Pumps continuously dispense large volume portions, or maintain volume supply for **F-Series Portioning Fillers**. This affordable series typically moves bulk product from the mixer to the filling line.

The **T-Series Transfer Pump** is a strong, yet gentle addition to your processing line. Stroke and draw rate can be infinitely metered to permit absolute control at all viscosity levels. Products such as potato salad, BBQ, chicken salad, creamed spinach, salsa, cheese dip, and a host of others flow through your filling line *continuously and efficiently!*
