The new HITEC " SABRE-10" peeler offers solutions for many common peeling problems.

Product Size :

The "SABRE-10" can peel casings as small as #13, and as short as 28.5mm (1 8/1").

Easy Adjustment :

Change-overs are quickly made without special tools.

High speed peeling :

Maximum peeling rate is 300m (985') per minute.

Better Quality Control:

Less scores on the product due to improved knife design.

Sanitary Design:

The cabinet design reduces standing water and lowers bacteria count.

Easily cleaned parts

All the parts that have contact with the products can be removed for cleaning. The cabinet and all removable parts are easily cleaned and sanitized.

Maintenance :

Easy access provides for quick repairs due to completely openable machine's rear side.

Reduced Steam Usage :

Careful construction and insulation reduces the amount of steam utilized, keeping utility costs in line.

Decreased Sound Level:

The "Sabre-10" provides a more comfortable environment for operators.

Options :

The "Sabre-10" can be ordered as a complete unit with vacuum cabinet, or as a stand-alone unit for use with central vacuum systems.
